

Thermos Store Plus

AQT250BSA ^[R13]

Device features

Buffer tanks are used to store heating water and increase the amount of water required in a heat pump system. For use in heating and cooling systems as a storage tank or as a hydraulic coupling. Tank made of black steel, insulated with polyurethane foam.

- Capacity 250 litres
- 5-year warranty

Specification

Model			AQT250SBHA R13
EAN Code			5905567602917
Tank	Capacity (class)	I	250
	Colour		White
	Tank material		Polyurethane foam / black steel
	Housing material		Steel
	Maximum pressure	bar	3
	Insulation thickness	mm	42
	Maximum temperature	°C	90
	Height	mm	1568
	External diameter	mm	584
Net weight	kg	63 / 85,3	
Hydraulic connections	Heat pump input	thread inches	1" x 4
	Heat pump output	thread inches	1" x 3
	Heater connection	thread inches	1 1/2"
	Upper connector - bleeding	thread inches	1"
	Sensor connection	thread inches	Ø15
	Water drain	thread inches	-
Warranty	Tank	years	5
Energy efficiency class			C
Maintenance			Not required
Static heat loss		W	88
Optional accessories / model			AGGE013
EAN code			5905567603266
Name			Electric heater
Power		kW	3
Dimensions		mm / inches / screw	6 / 4' / -
